

MOBILE ROBOTICS

Robot  
KOALA 2.5

## Outdoor and Indoor Robot

The Koala is a mid-size robot designed for real-world applications. Bigger than the Khepera, more powerful, and capable of carrying larger accessories, the Koala has the necessary functionalities for use in practical applications (like navigation, mapping, artificial intelligence, ...), it rides on 6 wheels for indoor or outdoor all-terrain operation, with a sports stylish bodywork for attractive demonstrations.

The Koala comes with a lot of sensors integrated from the factory, so, a very limited number of options is necessary to match your application. In addition, a bunch of inputs / outputs allows the user to integrate easily a wide range of devices from the market.
