

MOBILE ROBOTICS

KILOBOT
Robot

Low cost swarm Robot

The Kilobot is specially designed for large swarm experimentations. It opens a new range of possibilities for the researchers around the world.

- Low cost
- Small, only 33mm of diameter
- Fine motor control (255 different power levels)
- The Kilobot can communicate with neighbors up to 7 cm.
- Neighbor-to-neighbor distance sensing
- Ambient light sensing
- RGB led
- Rechargeable and removable battery
- Easy to manipulate, with the Kilobot controller you can program and control hundreds of Kilobots at one time.

The Kilobot takes the three K-Team standards which made the success of K-Team over years : Smart, Simple and the Swiss quality.
