

MOBILE ROBOTICS

Robot  
KHEPERA III

## Beyond miniature technology

The Khepera III is a real concentrate of technologies. It has the same performances of much bigger robots but can be hold in one hand. The Khepera III is designed to perform complex individual or swarm applications in a limited space such as a table top or on your lab floor. The possibilities are almost unlimited with all the extensions available, making it a standard in many worldwide universities.

The Khepera III takes the three K-Team standards which made the success of K-Team over years : Smart, Simple and the Swiss quality.
